

**ELECTRO-NUCLEONICS, INC.**

7101 Riverwood Drive ■ Columbia, Maryland 210

Thank you for your interest in our new VIRGOTM HTLV-III Assay.

On March 7, 1985 Electro-Nucleonics received license from the Food and Drug Administration to provide a test to detect circulating antibodies to the HTLV-III virus.

ENI's HTLV-III ELISA Assay is extremely sensitive (99.6%) as well as being specific (99.2%). It is with great pride that our company introduces this test kit in the anticipation of helping you in your quest to make the nation's blood supply safer.

In order to acquaint you with some of the technical and methodological details associated with this product, a brief introduction has been prepared which should serve to answer many of your initial questions. To assist you with further inquiries related to the test, cost and availability, the business card of the representative for your area has been enclosed.

We, at ENI, look forward to serving you in the future and will be contacting you soon. In the meantime, please do not hesitate to direct any unanswered questions to our representative.
