Dear Dr. Watt:

Thank you for participating in the WHO meeting on Acquired Immunodeficiency Syndrome. Your contribution was particularly helpful. Enclosed is the first draft of the document. Your careful review and comments would be appreciated. The hurried minutes of the last day left some items not fully resolved. Since the final document will be written by WHO, please send your comments by January 6 to Dr. G. Causse, Chief, Bacterial and Venereal Infections Unit, World Health Organization, 1211 Geneva 27, Switzerland.

As requested, I have asked the CDC safety group to review the precautions for health-care workers and allied professionals. Mr. Vinse Oviatt, Coordinator, Special Program on Safety Measures in Microbiology, also has agreed to comment from the WHO perspective. These items will be sent to you before the meeting report is prepared in final form by WHO.

Thank you for your help in this important problem.

Sincerely yours,

Walter R. Dowdle  
Director  
Center for Infectious Diseases
