Thank you for agreeing to counsel and test this patient. For your assistance and information I am enclosing the following documents:

1. Nationally agreed counselling guidelines.
2. A form (LBF3) to document the outcome of the counselling process.

It is important that the sample for anti-HCV testing is sent to a diagnostic microbiology laboratory that has the capability for confirmatory testing and that a copy of the results of the test are forwarded to the Transfusion Centre.

If you have any further queries as a result of this letter please do not hesitate to contact me.

Yours sincerely

Dr P Yates  
Consultant
