*Review Liver Biopsy  
H95-628*

Dear Dr. Forrest.

Eileen O'Hara. d.o.b. 09/10/30. Unit no. 093961.  
66 Menzies Road. Glasgow. G21 3LY.

This lady was reviewed by myself and Dr. Dunn in the Cardiology Clinic on 29/02/96. She is known to have mixed mitral valve disease with two previous valve replacements. She is also known to be hepatitis C positive and biopsy in June 1995 showed an established cirrhosis. You may recall you reviewed her case-notes in October 1995 in response to Dr. Prasad's request and questions about Interferon. At the time she was thought not to be suitable and it is our understanding that she may be called back for further biopsy to see if there is any evidence of ongoing hepatitis. We would be most grateful for your advice.

Yours sincerely.
