Dear. Dr. Forrest.

Eileen O'Hara. d.o.b. 9.10.30. Unit no. 093961.
56 Menzies Road. Glasgow. G21 3LY.

I wonder if you could kindly review this lady who has had mitral valve replaced and re-done, the last operation being 1991. We have been investigating her for hepatosplenomegaly. I enclose her recent clinic letter. Notably she is Hepatitis C positive and a recent liver biopsy suggests she has cirrhosis consistent with Hepatitis C and we wondered whether further management might include Interferon. We will be reviewing her again in our Cardiology Clinic but would be happy for your advice.

Yours sincerely.

N. Prasad.
 Career Registrar.
