Dear Dr Davda

EILEEN O'HARA, DOB 09 10 30, UNIT NUMBER 093961
56 MENZIES ROAD, GLASGOW G21 3LY

Diagnoses:

1	Mitral valve disease, previous mitral valvotomy and porcine MVR, St Jude Bi-leaflet mechanical valve, 1991.
2	Unexplained hepato-splenomegaly
3	Hepatitis-B antibody +ve
4	NIDDM

This lady is a little troubled by dyspnoea if she rushes, but otherwise her cardiac condition is stable.

Physical findings were of atrial fibrillation at 96 beats per minute, her blood pressure was 130/75 mmHg, there were normal prosthetic mitral sounds, there were coarse crepitations at the left base non-clearing and 8 cm hepatomegaly and 8 cm splenomegaly on examination of the abdomen. Her dental hygiene is poor and I have organised a review at the Dental Department here at Stobhill.

I understand Dr Forrest plans to review her case later on today. You should expect to hear from him directly in due course.
