DATE OF OPERATION		14.07.97

SURGEON'S NOTES

DR A BOWMAN

OPERATION PERFORMED

SURGEON

SOURCE: Dr Cumming, Consultant Haematologist

PROCEDURE: Upper Endoscopy

INDICATIONS: Iron deficiency anaemia ? cause

INSTRUMENT: Olympus video-gastroscope

SEDATION: 20 mgs. Diazepam 20 mgs. Buscopan

FINDINGS: Oesophagus - gastro-oesophageal junction 40 cm. Two small columns of varices proximal to this at 3 and 6 o'clock No stigmata of recent bleeding.

Stomach - normal stomach

Duodenum - normal

CONCLUSION: This lady has evidence of portal hypertension with two small varices although it is extremely unlikely that these are the cause of iron deficiency anaemia.

There was no obvious source of bleeding throughout the remainder of her G.I. Tract.
