Dr A Davda
Springburn Health Centre
200 Springburn Way
GLASGOW
G21 17R

Dear Dr Davda

**EILEEN O'HARA DOB 09 10 30 UNIT NO 093961
66 MENZIES ROAD, GLASGOW, G21 3LY**

Eileen O'Hara has been seen for further review at the Clinical Haematology Unit on the 22nd July 1997. Her condition is very much unaltered. An upper GI endoscopy had been performed on the 16th July 1997, which demonstrated evidence of portal hypertension with two small varices present, but no other abnormality was noted. No obvious source of bleeding was noted.

The current haematological parameters are relatively unaltered with a haemoglobin of 145g/l, a white count of $2.9 \times 10^9/l$ and a platelet count of $52 \times 10^9/l$. The haemoglobin A1C level stood at 9%.

I suggest that she continues on Ferrous Sulphate 200mgs twice daily and an appointment has been made for review on the 7th October 1997.

Kind regards.

Yours sincerely

DR R BROOKE HOGG
Consultant Haematologist
