Dear Mr Naik,

EILEEN O'HARA, DOB: 9.10.30 STOBHILL NO: 93961
56 MENZIES ROAD, GLASGOW, G21 3LY
ROYAL INFIRMARY NO: 910336L

This patient attends your Clinic with a mitral valve replacement. I saw her recently at my Diabetic Clinic, and on routine examination noted her to have hepatosplenomegaly.

She is very well and I assume that this is an old phenomenon which has been noted before, and have not, therefore, arranged any further investigations.

I would be very grateful if you could confirm with me that this is the case, since obviously if it is a new thing, it will have to be looked into.

With many thanks.

Yours sincerely,

E H McLAREN
