16th February, 1993

Dear Dr. Davda,

Eileen O'Hara 9.10.30
56 Menzies Road, Glasgow G21 3LY

This lady has attended Mr. Naik's Cardiac Surgical Out-patient Clinic for annual check up following her redo mitral valve replacement done in October, 1991. She does not seem to have any symptoms of heart failure and on examination her prosthetic valve is functioning normally and there is no clinical evidence of any heart failure and she is on Warfarin and Digoxin and Diumide (Frusemide with Slow-K). I have advised her to come and see us in a year's time for annual check up.

Yours sincerely,

D.P. Koneru
Senior House Officer III
