NOTE:MRS E O'HARA - UNIT NO 910336

Mrs O'Hara telephoned on 15th January 1991 explaining that she had attended our clinic on 1st June last year. She said her valve was leaking and that she had expected to receive an appointment to attend our clinic by now.

16th January 1991 - No case sheet in place - marked out to "Gastric" for 15th January 1991. Checked typing pool for case sheet - no luck.

Photocopied operation note and traced completed follow-up form from 1st June 1990. Nothing abnormal on the follow-up form completed at the time of her attendance. COPIES OF OP NOTE AND FOLLOW-UP FORM ATTACHED

Spoke to Margaret T who confirmed that noting abnormal noted on the form therefore refer this to Mr Dimitri (Mr Reece had carried out the operation in 1985) and ask him to see her at his clinic.

Spoke to Mrs O'Hara to explain the position. She advises that she attended Urology Clinic on 17th December 1990 and had an ECG and various other tests done. She was told then that her valve was leaking and that they (Urology) would refer her to the Cardiologists and that she would be receiving an appointment in the near future.

Understandably, Mrs O'Hara is most concerned. I said I would telephone her on Thursday morning after speaking with Mr Dimitri.

Traced Case Sheet. Letter inside from the Registrar in the Gastroenterology Dept. COPY ATTACHED

17th January 1991 - Spoke to MMT and showed her the letter. She said to bring Mrs O'Hara to our clinic this Friday for examination.

MARGARET W.
