Dr. A.R. Lorimer
Consultant Cardiologist
Ward 66
Royal Infirmary
Glasgow

Dear Dr. Lorimer,

RE: Eileen O'Hara (9.10.30) 56 Menzies Road, Glasgow, G31

I reviewed Mrs. O'Hara today in the valve follow up Clinic according to her request. She was seen by Dr. MacKenzie's registrar on 17th December 1990 and she was referred to yourself. The echo Dopplar examination performed then showed mitral regurgitation and tricuspid regurgitation to be the origin of her liver enlargement. The clinical findings today were compatible with the echo findings. I will be grateful if you can give her an early appointment for your Clinic since she needs a mitral valve re-replacement as soon as possible.

Yours sincerely

EL FI KY
Lecturer
