Dr. A. Davda,
Springburn Health Centre,
200 Springburn Way,
GLASGOW G21.

Dear Dr. Davda,

Re. Eileen O'Hara, 56 Menzies Road, Glasgow G21
DOB 9.10.30

The recent investigations carried-out on your patient show that she has moderate to severe mitral regurgitation with a pulmonary artery pressure of 35mm mercury. Overall I think this reflects a fair degree of valve dysfunction and this will need to be looked into further. I will write to Mrs. O'Hara directly so that we can bring her back to the clinic and discuss the results.

In the meantime however if she consults you with breathlessness a prescription of a loop diuretic such as Frusemide 40mgs might be the most appropriate first step.

Yours sincerely,

J. Morris
Registrar
