Ref.:— JH/SA

STOBHILL GENERAL HOSPITAL,
GLASGOW, N.1

4th February, 1963.

Dr. W.E. Gifford,
609 Springburn Road,
GLASGOW, N.1.

Dear Dr. Gifford,

Mrs. Eileen O'Hara - 32 years - Unit No. 93961,
57 Bedlay Street, Glasgow, N.1.
Admitted 5.1.63 - Discharged 30.1.63.

This woman was admitted to Ward 4B on the 5th of January with typical pure mitral stenosis. Mitral valvotomy was carried out by Mr. W.H. Bain on the 11th of January. Her post-operative course was uneventful and a good valvotomy was obtained in a mobile valve. The cardiac findings post-operatively were satisfactory. She was in sinus rhythm with a soft systolic murmur at the apex. There is a well marked third sound with a doubtful diastolic murmur heard at the left lateral position. There was no evidence of heart failure.

She was discharged home on the 30th of January and will be reviewed at the return clinic in due course. She should continue on oral iron until then.

Yours sincerely,

J. Hynes,
Registrar.
