Dear Dr Duncan

Victor Tamburrini – DOB 27/04/57  
284e London Road, Glasgow, G40 1PT

Mr Tamburrini attended for review at the Haematology Clinic on 28<sup>th</sup> November 2001. I note he had been discharged from this clinic at his last attendance but appears to have been re-appointed. He tells me he is generally well though clearly has concerns regarding his diagnosis of Hepatitis C. I note he is also being investigated for the possibility of Haemochromatosis, he tells me he has succeeded in reducing his alcohol consumption significantly. I have not repeated his bloods today though I note that his counts over the last few months have been fairly steady with significant macrocytosis persisting. I have not re-appointed him for this clinic but will be happy to see him if you felt this to be necessary.

Yours sincerely

Peter Maclean  
Senior House Officer in Haematology III
