Dr Rashid
Bridgeton Health Centre
201 Abercrombie Street
Glasgow

Dear Dr Rashid

Victor Tamburrini 27.4.57
21 Madras Place Bridgeton Glasgow

This young man was admitted to the Burns Unit of the Royal Infirmary on 7.9.84 having sustained approximately 18% surface area burns as the result of a vehicle petrol fire. This involved his face, both hands, back and his left thigh. The burns were all thought to be partial thickness and there were some areas of deep dermal damage. They were treated conservatively with dressings and he was discharged on 6.10.84 and is attending the out-patient clinic for dressings.

Yours sincerely

J.D. Watson
Registrar in Plastic Surgery
to Mr W.H. Reid
