FACTOR VIII ASSESSMENT 24/6/85

Attached are lists showing Factor VIII.

a) Remaining batches of recalled material now heat treated 68°C/2hrs).

b) Material prepared in the specification.

The new material (b) is now awaiting delivery of the new inserts before labelling and packing can be completed.

A decision as to its eventual issue will then be required.

On present issues, a very rough guestimate on material in the various centres, gives the following months of stock left.

Aberdeen : 10 months
Belfast : Difficult to calculate
Dundee : 2 months
Edinburgh : 6 months
Aberdeen : 2 - 3 months
Inverness : 12 months.
