MEMORANDUM

To: Dr. P. Foster  From: Dr. Perry
cc Mr. H. Crowston
     Dr. B. Cuthbertson
Subject: Control Parameters for FVIII Manufacture  Date: 29th November 1989

I am grateful to you for agreeing to take the lead in defining key control parameters for manufacturing processes. We agreed that in the first instance you should concentrate on FVIII and aim to have this completed by the end of this year.

At this stage you should restrict your activities to definition of key control parameters, operating/warning limits and some sort of spreadsheet format for management reporting. It will then become a matter for Production Department to establish the necessary management responsibilities of surveillance systems.

Thereafter we can review how best to extend the exercise to other products or processes.

Dr. R.J. Perry
Director
